About the Gralix Tech Conference 2026

This year, the conversation expands beyond Insurtech to fully embrace PensionTech as a core feature of the protection ecosystem. This reflects the growing convergence of technology, insurance, and retirement systems across Africa.

Moving from connection to acceleration, GTC 26 will explore how digital innovation, data, and artificial intelligence are reshaping both the insurance and pensions landscapes, driving smarter products, stronger governance, enhanced efficiency, and sustainable long-term value.

Key areas of discussion will include:

- ✔ Harnessing Data for Dynamic and Predictive Pricing
- ✔ Leveraging AI to Combat Claims Fraud and Minimize Leakage
- ✔ Fostering Innovation in Customer-Centric Insurance and Pensions Product Development
- ✔ Embracing Technological Advances for Sustainable Growth in Insurance and Pensions
- ✔ Deploying AI for Enhanced Efficiency and Profitability
- ✔ IFRS 17 Tools for Streamlined Financial Reporting

Join us at GTC 26 as we continue to shape the future of Insurtech and Pentech in Africa, empowering the insurance and pensions industry to thrive in a rapidly evolving digital world.
